

Clinical Supervision & Education **of** **Your Clinical Care Team**

As our Health and Aged Care Sectors undergo profound transformations, leadership through clinical supervision & education is paramount to ensuring the delivery of high-quality care and services.

Drawing on real world experiences this session will explore what clinical supervision is, why it is an essential component to ensure that all clinical staff understand what is expected of them, what to deliver and how to deliver it.

We will offer insights and contemporary approaches to navigate three of the biggest challenges, exploring:

Challenges:

1. Expectation setting for staff
2. Clinical expertise, practical application.
3. Your roles as coach and mentor

Solutions:

The purpose, role and expectations of Registered Nurses requires continuous thinking and analysis. They are responsible and accountable for clinical supervision and the delegation of nursing activity to Enrolled Nurses and others.

Effective high quality clinical care is driven by knowledge, expectation setting and is monitored and supervised.

Learn contemporary approaches to clinical supervision & education for staff, using tried and tested tools and guiding documentation to assist you.

Impact:

Avoid the potholes of assumption; Learn how to use standards and frameworks to guide and assist you to create impact AND understand the leadership capability required

Attendees will leave this session with an understanding of their role, their accountabilities and have actionable insights with practical strategies to cultivate leadership capabilities that drive real change and make a difference.

So, whether you are a seasoned clinical manager, an inspiring leader or new to clinical leadership join Allison in exploring how effective leadership can unlock your potential and that of your clinical team.
